

Conettix Receiver: powerful and flexible gateways

BOSCH
Invented for life

Conettix Receiver: Programmed to receive

The Conettix family is a complete line of security communication products for intrusion and fire systems. It includes communicator solutions for security systems as well as receiver solutions for monitoring centers. Conettix products give you reliable data transmission over a wide range of paths and formats used for data up/download, transfer to monitoring centers, and event notification.

The receiver is the gateway to the monitoring center. And the Bosch D6600 and D6100 Receivers are true gateways with extensive functionality.

A major strength is their ability to receive event information in over 76 different formats over multiple transmission paths. Both receivers are compatible with a wide

range of automation software solutions available on the market worldwide and can also be operated standalone.

New formats and features are constantly being added to extend the receivers' functionality. It's child's play for you to install new firmware, thanks to the convenient One Button Upgrade functionality. And programming is also very simple using either a PC-based software package or the unit's keypad.

Key benefits of Conettix Receivers:

- **Flexibility**
- **Intelligent functions to detect formats faster**
- **Supports audio verification**
- **Easy upgrading**

D6100 Receiver

D6600 Receiver

D6100 Receiver

The D6100 Receiver comes with a fixed configuration of two PSTN lines. The compact design of the D6100 makes it well-suited for applications such as small monitoring centers, gated communities, security offices or university campuses.

D6600 Receiver

The D6600 Receiver comes configured with four PSTN lines, expandable to 32. This award-winning receiver features unmatched processing power in a space-saving package. With additional hardware components, the D6600 supports IP transmission and serves as a wireless receiver. It is an excellent receiver for large monitoring centers.

The outstanding price/performance, functionality and ease of use of the D6100 and D6600 Receivers make them the ideal choice. They give you full flexibility by receiving virtually all kinds of security communication formats over multiple transmission paths.

Conettix Receiver: many formats over various transmission paths

Tradition of quality and innovation

For over 100 years, the Bosch name has stood for quality and reliability. Bosch Security Systems proudly offers a wide range of fire, intrusion, social alarm, CCTV, management and communication systems and components to help you find the solution for any application. We are the global supplier of choice for innovative technology backed by the highest level of service and support. When you need solutions you can rely on, choose Bosch.
