Security and automation for your mobile life

Smart, connected systems that control security, lighting, heating, cooling and more—all customized for your home or business.

BOSCH
Invented for life

Automatically turn lights on and instantly change thermostat settings when you disarm your security system. Leave home and select 'Away' on your smart phone app to automatically lock the doors, arm your security system, turn off interior lights and adjust the thermostat. With Bosch, home control has never been more effortless. Get a text message or email when your doors are unlocked. View still images or live video so you know everything is safe and secure, even when you're miles away.

Bosch's support of a broad range of wireless devices provides flexible, remote control of internal and external lights, door locks, thermostats, IP video, and more. Combined with Bosch's award-winning B and G Series control panels, homeowners and businesses have a powerful solution that brings together the best in intrusion prevention, fire detection, home automation and remote monitoring.
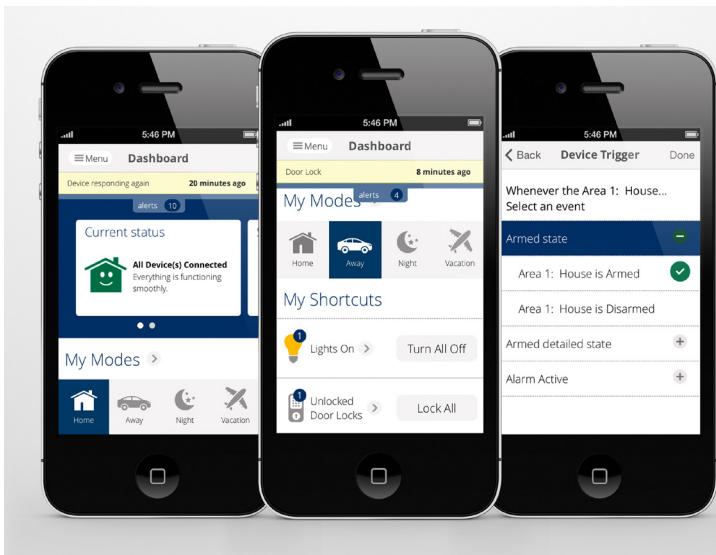

Advantages

▶ Control key security devices anywhere 24/7

▶ Automate home monitoring and control including cameras, lights, locks and more

▶ Add over 200 Z-Wave, ZigBee, Ethernet, WiFi, and Bluetooth devices to your system

▶ Control everything from a smart phone, laptop, or desktop PC

▶ User-friendly interface with virtual scene creation wizard eliminates complex programming

Bluetooth® **Wi-Fi** **Z-WAVE®** **ZigBee™**
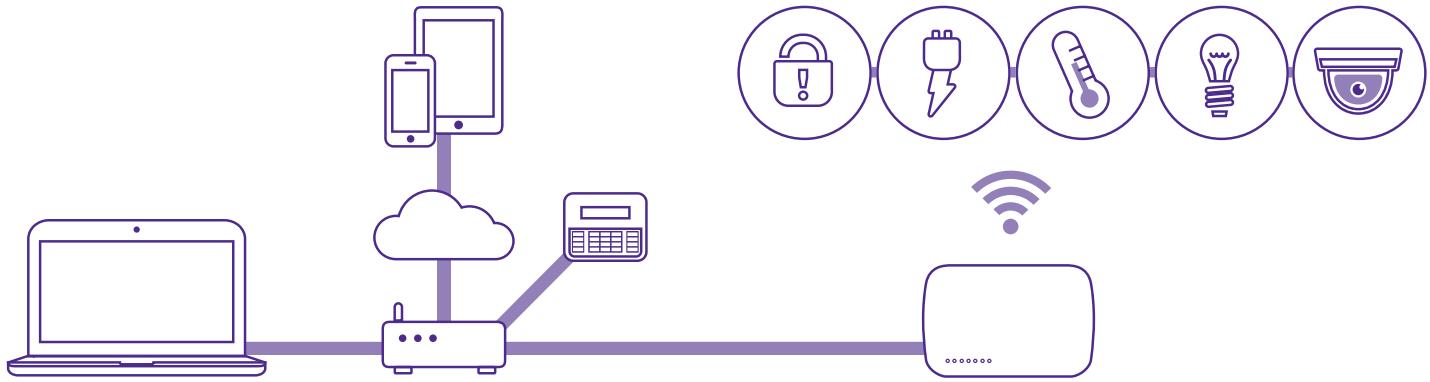

How it works

▶ The intrusion alarm panel connects to the G450 Home Control Gateway

▶ The G450 connects to the local network via Wi-Fi router, broadband modem or wired hub

▶ A user-friendly dashboard enables system control from a mobile device or Internet-enabled computer

▶ An accompanying Home Control service plan securely stores system data in the cloud

No wires to run means a quick, no-fuss installation. Once installed, the system set up and ongoing operation can be controlled 24/7 from a user-friendly interface for mobile devices and Internet-connected computers. The app provides one-touch arming of multiple devices for common modes such as Home, Away, Night and Vacation. The associated cloud service stores system data without additional hardware.
