2 Version 1.3 firmware

Firmware v1.3 is available for the RADION receiver OP-CHI (RFRC-OPT-CHI)

2.1 What's new?

This section examines the new features of this firmware version.

This firmware includes the following new features:

- Support for the following RADION key fobs using synchronized encryption:
 - RFKF-FBS-CHI
 - RFKF-TBS-CHI
- LED flashing to indicate receiver firmware version.
 - The RFRC-OPT-CHI uses LED flash indications to display the firmware version upon powering up. For example, firmware v1.3 flashes one flash followed by a one-second pause (off), and then three flashes.

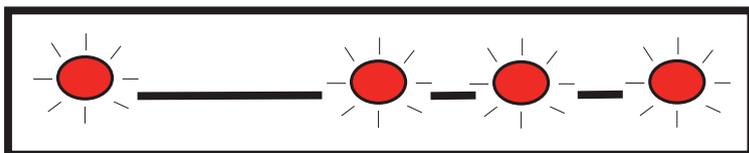

Figure 2.1: Firmware version LED pattern (v1.3 shown)

Notice!

RFRC-OPT-CHI receiver firmware v1.3 or higher is required when using these RADION key fob products.

2.1.1 Determine the firmware versions of the RFRC-OPT-CHI receiver

The current firmware versions are displayed on the receiver's box label located on the back of the box, and on the product label located inside the receiver. Refer to the figures below to locate and determine your receiver's current firmware version.

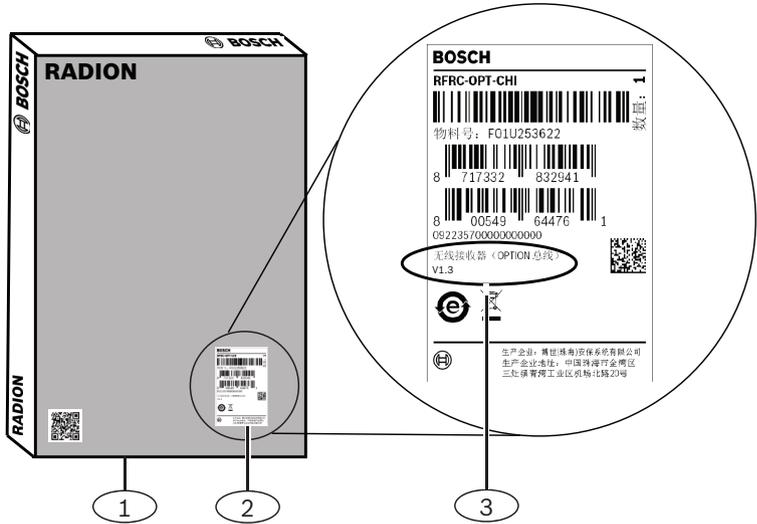

Figure 2.2: RFRC-OPT-CHI box label and firmware version

Callout — Description
1 — Receiver box
2 — Receiver box label
3 — Receiver firmware version

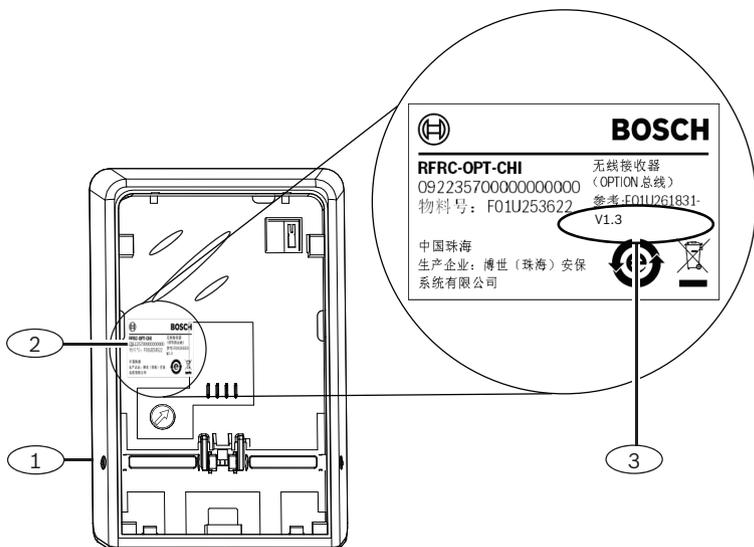

Figure 2.3: RFRC-OPT-CHI receiver label and firmware version

Callout — Description
1 — Receiver
2 — Receiver label
3 — Receiver firmware version

The current firmware version is also determined by LED flash patterns when the receiver powers up. Refer to Section 2.1 for more information.
